

## Pre-School "SEE" Program

The Park Shore Pre-School "SEE" Program Specialized Enrichment Experience

Park Shore continues to give our students the most fulfilling academic and social experiences with the introduction of our "SEE" program, (Specialized Enrichment Experience.) To meet the changing statewide curriculum standards, park shore has introduced this enrichment program inclusive of all of our students. Three and four year old children experience extended academic activity with a weekly focus on developing their problem solving and critical thinking skills. Each week is focused on a specific topic consistent with our already well-established thematic units.

Our objective is to further enhance the concepts and skills your children will need to be successful in their future learning endeavors. Our students partake in enriching activities in reading, writing, phonics, math and science in a fun filled and challenging learning experience. Classroom teachers extend the concepts in their classrooms to further enhance the learning environment. Headed by Dianne Vitucci, our program director and an expert in early childhood education, our students are truly given the tools needed for all future learning endeavors.

- Emergent Literacy Skills
- Phonemic Awareness
- Critical Thinking Skills
- Problem Solving Strategies
- Exposure To Mathematical Operations, Patterns, And Functions
- Utilization Of Mathematical Manipulative's
- Hands On Scientific Exploration
- Sign Language
- Developed To Meet Statewide Curriculum Standards
